| Standaard voorbeeld
* Naam bestand / Class
* Omschrijving bestand / Class
* @author Naam bestand maker <email@adres.nl>
* @package Pakket naam bijv. Schademonitor
* @subpackage Subpakket naam bijv. Controllers
* Wijzigingen
* @since date 23-9-2013 Naam wijziger -
Omschrijving Wijziging
* @todo Omschrijving over wat nog te doen.
| Subpackage met extra maplaag voorbeeld
* Naam bestand / Class
* Omschrijving bestand / Class
* @author Naam bestand maker <email@adres.nl>
* @package Pakket
* @subpackage Subpakket\Submap
* Wijzigingen
* @since date 23-9-2013 Naam wijziger -
Omschrijving Wijziging
* Te doen
* @todo Omschrijving over wat nog te doen.
| Nieuwe functie andere author dan de class
voorbeeld
|-----
* Functie omschrijving
* @author Naam bestand maker <email@adres.nl>
* Wijzigingen
* @since date 23-9-2013 Naam wijziger -
Omschrijving Wijziging
* @todo Omschrijving over wat nog te doen..
* @param Parameter die meegestuurd wordt aan
functie
* @return {type} Wat returned deze functie
```

Inline Tag	Values	Description	/*
{@example}	{@example /path/to/example.php startline number of lines} {@example url://path/to/example.php startline number of lines} {@example relative/path/to/example.php startline number of lines}	e Display source code of an example file inline	Bestand met meerdere wijzigingen voorbeeld
{@id}	{@id sectionname}	Used to control XML tutorial ids in refsects	* * Omschrijving bestand / Class
{@internal}}	{@internal any text including inline tags}}	Mark documentation as private, internal to the software project in text flow	* @author Naam bestand maker <email@adres.nl></email@adres.nl>
{@inheritdoc}		Used to directly inherit the long description from the parent class in child classes	* * @package Pakket * @subpackage Subpakket\Submap
{@link}	{@link URL description} {@link element description}	Display a link to a URL, or link to an element's documentation in the the flow of descriptive text	* * Wijzigingen * @since date 15-9-2013 Naam wijziger -
{@source}	{@source startline number of lines}	Display source code of a function or method in the long description	Omschrijving Wijziging * @since date 20-9-2013 Naam wijziger -
{@toc}	{@toc}	Display a table of contents of all {@id}s declared in a file	Omschrijving Wijziging * @since date 22-9-2013 Naam wijziger -
{@tutorial}	{@tutorial package/ subpackage/ tutorialname.ext #section.subsection description}}	Display a link to a tutorial in the flow of descriptive text	<pre>Omschrijving Wijziging * @since date 23-9-2013 Naam wijziger - Omschrijving Wijziging * * Te doen * @todo Omschrijving over wat nog te doen. * */ /* Bestand met meerdere te doen voorbeeld </pre>
